

Update Primary Key Using Connect SQL Query and Activity..

In this scenario updating pyGUID which is primary key to Account ID as primary key.

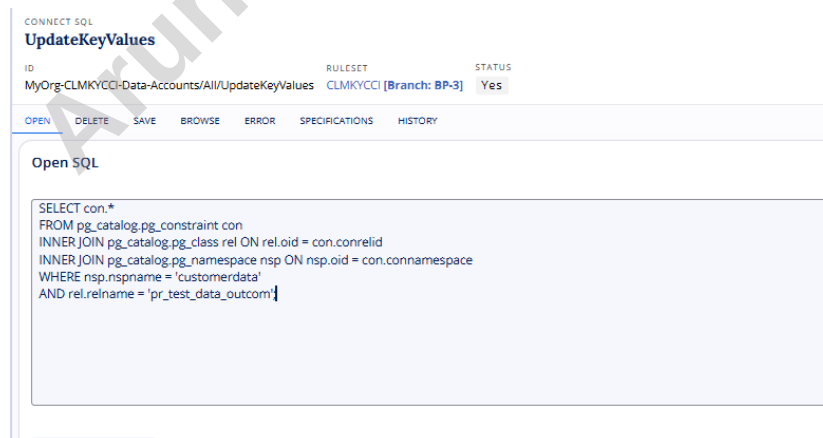

In Accounts Data Type pyGUID is primary Key now let's replace it with account ID..

Step 1: Retrieve the Constraint Key Value Create a **Connect SQL** rule and place the following query under the **Open** tab.

Run an activity with the RDB-Open method, enable the Tracer, and inspect the RDB-Open step page to capture the constraint key value.

Create connect sql rule and update database table as per your need and use this sql query.

ACTIVITY
UpdateKeyValues

CLASS: MyOrg-CLMKYCCI-Data-Accounts ID: UpdateKeyValues RULESET: CLMKYCCI [Branch: BP-3] STATUS: Yes

This record has 1 severe or moderate warning (including 1 unjustified) and 1 info warning [View](#)

STEPS PARAMETERS PAGES & CLASSES SECURITY TEST CASES SPECIFICATIONS HISTORY

Label	Method	Step page	Description
1. ☐ Loop When >	Page-New	Tempp	Create a page
2. ☐ Loop When ✓	RDB-Open	Tempp	Open

Method Parameters

Name	Value
★ OpenClass	MyOrg-CLMKYCCI-Data-A
★ RequestType	UpdateKeyValues
★ Access	All
RunInParallel	☐

3. ☐ Loop When > Page-Remove Tempp Remove page(s)

+ Add a step Collapse all steps Expand all steps

Action: Turn on the **Tracer**, then **Run** the activity. Click the RDB-Open step in the Tracer, inspect SQLPage in memory, and copy the exact constraint string (e.g., pr_myorg_clmkycc1_data_transca_pk).

2.RDB-SAVE

CONNECT SQL
